### Product Specifications

- The Flare Fireplace is certified for use with either Natural Gas (NG) or Propane (LP).
- The Flare Fireplace operates with a direct vent, balanced flue system. A direct vent gas fireplace is room-sealed using ceramic glass.
- The Flare Fireplace use’s double pipe vent flue to pull in fresh air from outside & release exhaust gases to the outside. Clearances to combustible materials MUST be maintained. Refer to **Installation Manual** for clearance distances.
- The Flare Fireplace must be properly connected to a venting system.
- The Flare Fireplace must be installed according to requirements as presented in the **Installation Manual**, as well as complying with all local codes. If no codes exist, then the current CSA installation code must be followed.
